

Cindy Arbelaez V.

Front end Developer

(+57) 3053552579 · cindypao27@gmail.com

Skills

HTML

CSS3

JavaScript

React

Redux

RESTFUL APIs

Node.js

Git

Objective

To make use of my problem solving, technical and interpersonal skills (communication, listening, positive attitude, teamwork) for the growth of the organization.

Recent Web Projects

Ibuy Marketplace

- React, Redux, Node.js, Express.js
- Built a fictional Marketplace App from Scratch. For the backend side, I created the REST APIs with Express and use these endpoints in the React frontend. For the front end I used Redux for state management, Firebase to handle product and shop images, and followed the best practices to implement Authentication using JWT.

The One Way Journey

- Next.js, GraphCMS, Css Modules
- I took an existing Wordpress blog and turned it into a headless CMS with Next.js on the front-end and GraphCMS as a back-end only management system.
